

Multi-Utility Connections Contractor
Water - Gas - Electricity - BT

MULTI-UTILITY CONTRACTORS

J.Geraghty Ltd

J. Geraghty is a leading utility contractor specialising in all aspects of utility works and a multi-utility provider for new developments. We specialise in the infrastructure and connection of gas, water, electricity and BT.

We manage and direct the project from start to finish, promising a reliable and professional service making it as cost effective as possible.

We have been in the industry since 2001 and have built the company on top of our strong and reliable reputation throughout the industry.

With our head office based in the heart of the UK in West Yorkshire, accompanied with our ever expanding large fleet of vehicles, we offer a full nationwide coverage to support you no matter where you need us.

Full Utility Infrastructure Management

It can be difficult co-ordinating separate utilities and telecoms providers when you have other site issues to contend with. At J Geraghty, we make utilities and telecoms provision simple by offering a full-service solution.

Our accredited teams work together to deliver efficient gas, electric, water and telecoms systems that perfectly meet the needs of your development. This is more efficient and often more cost-effective than contracting separate providers.

To find out more about any of our services, contact our exceptional team to discuss your requirement.

Fully Accredited

We have all the relevant accreditations from the Gas Industry Registration Scheme (GIRS), National Electricity Registration Scheme (NERS) and Water Industry Regulation Scheme (WIRS).

Water Utility Solutions

Every development is unique and needs to be planned carefully. We tailor our services to meet your requirements, no matter how complex the project.

With our extensive experience and wealth of industry knowledge, we are perfectly positioned to design and implement the most suitable water solutions for your development. Our aim is to ensure the safety, efficiency and reliability of your water solution.

Water Infrastructure and Connection

Our accredited team of experienced contractors can accommodate all types of water connection and installation works including:

Commercial & domestic water connection

Commercial & domestic water disconnection or relocation

Temporary water supply

Water chlorination testing

Provision and install of water meters

NERS Accredited

Accredited by the National Electricity Registration Scheme (NERS), we are certified to carry out all types of electrical installation works whether for domestic, commercial or industrial developments.

Our qualified electrical specialists bring a vast amount of industry knowledge and experience to any project.

BT Utility Solutions

Whatever size or scale your project, we put together a solution that is most appropriate for your needs. Our expert team will work with you to design and plan the most efficient telecoms infrastructure for your development.

Once the plans are finalised, we ensure they are executed correctly, and work is delivered to the highest-standard, ready for the next stage of your project.

Telecoms Infrastructure and Connection

Our team of experienced contractors take care of installing your telecoms infrastructure including:

Single-lay duct for BT or other comms providers

Multi-lay duct for BT or other comms providers

Provision of ancillary equipment

Install of ancillary equipment including boxes and manholes

Ensure readiness for adoption by respective providers

Installation of duct, box and draw cords

Associated reinstatement works

BT Experienced Team

Our team of engineers bring a wealth of knowledge and experience to every project, ensuring that the solutions we provide are the most appropriate for your unique needs.

New Build Utility Solutions

Co-ordinating several utility providers is not only time-consuming, but it can also increase your costs. At J Geraghty, we are experts in designing, planning and managing the installation and connection of all utilities as a single project.

We work closely with you to design the most appropriate infrastructure and get the required approvals.

Our qualified teams then co-ordinate the safe install of each element, ensuring this is done efficiently with minimum disruption. We liaise with all relevant authorities and mandatory bodies on your behalf, reducing the workload for you or your site manager.

Our full-service solution reduces the cost of your project and gives you complete peace of mind that your utility needs are under control.

New Build Utilities Installs

Our accredited team of experienced contractors can accommodate all types of designing, planning, installing and connecting of your gas, electric, water and telecoms solutions:

- Comprehensive design and planning
- Electricity installation and connections
- Gas installation and connections
- Water installation and connections
- Telecoms ducting and arrangement of private networks
- Complete utilities project management
- Commercial or domestic developments
- Application to relevant authorities for supply
- Co-ordination of service connections
- Provision and install of ancillary equipment
- Associated works: excavation, backfilling, reinstatement

Complete Project Management

As a leading utility contractor, J Geraghty has extensive experience in managing utility provision and installation on a vast range of developments. We manage your project from start to finish, delivering a reliable, professional and efficient service.

Let our experienced team take care of your gas, electric, water and telecoms infrastructure.

Contact us today to discuss your project.
