BT Experienced Team

Our team of engineers bring a wealth of knowledge and experience to every project, ensuring that the solutions we provide are the most appropriate for your unique needs.

New Build Utility Solutions

Co-ordinating several utility providers is not only time-consuming, but it can also increase your costs. At J Geraghty, we are experts in designing, planning and managing the installation and connection of all utilities as a single project.

We work closely with you to design the most appropriate infrastructure and get the required approvals.

Our qualified teams then co-ordinate the safe install of each element, ensuring this is done efficiently with minimum disruption. We liaise with all relevant authorities and mandatory bodies on your behalf, reducing the workload for you or your site manager.

Our full-service solution reduces the cost of your project and gives you complete peace of mind that your utility needs are under control.

New Build Utilities Installs

Our accredited team of experienced contractors can accommodate all types of designing, planning, installing and connecting of your gas, electric, water and telecoms solutions:

Comprehensive design and planning
Electricity installation and connections
Gas installation and connections
Water installation and connections
Telecoms ducting and arrangement of private networks
Complete utilities project management
Commercial or domestic developments
Application to relevant authorities for supply
Co-ordination of service connections
Provision and install of ancillary equipment
Associated works: excavation, backfilling, reinstatement

Complete Project Management

As a leading utility contractor, J Geraghty has extensive experience in managing utility provision and installation on a vast range of developments. We manage your project from start to finish, delivering a reliable, professional and efficient service.

Let our experienced team take care of your gas, electric, water and telecoms infrastructure.

Contact us today to discuss your project.
